

DriverSafe[®] Plus

Effectively manage driver-related risk across your entire fleet with our user-friendly web-based analytics platform

Improving safety, maintaining compliance, and reducing your liability across your roster of drivers is critical for the health of your business. Don't rely on a stack of spreadsheets to piece together what's really going on.

DriverSafe[®] Plus is an easy-to-use interactive driver-risk-management platform that analyzes motor vehicle report (MVR) data instantly — even for thousands of drivers. With a few clicks of the mouse, you can perform tasks and run analyses that will help you take appropriate actions to reduce driver liability — before it causes real problems.

When you log in through our secure web portal, you get access to tools that help you maintain compliance and a dashboard of critical MVR metrics across all your accounts and locations. You can even schedule MVR requests in advance, making it easier for you to administer your compliance program.

With our dynamic filtering option, you can easily:

- evaluate enterprisewide driver performance
- compare drivers by region or other key driver group attributes
- see detailed information on individual accounts or drivers
- order one, dozens, or hundreds of MVRs in seconds

And with storage of MVRs and employee records, DriverSafe Plus makes it easy to spot trends and identify high-risk drivers.

Easy-to-read visual analytics

You get focused risk management analysis presented in easy-to-read color charts, graphs, and tables to highlight driver risk factors of concern.

You'll see:

- a side-by-side comparison of a driver's recent and previous MVRs, with changes highlighted
- a display of your company's custom violation scoring
- analysis of key driver data, including medical certificate and driver's license expiration, as well as license status, class, and type
- executive summary reports by month of all risk analysis data with automatic archive

Driving Decisions for Your Business

DriverSafe Plus Interactive Reporting

See at a glance the driver information you need, and drill down to the critical details for effective management of your fleet. Features include:

DriverSafe score

- Your fleet classified with your scored risk scale
- Drivers in each classification band
- Details on individual drivers
- Violation library on individual drivers

License expiration

- Drivers with expired licenses or number of days until expiration

Driver's last MVR

- During the past months or year — or never

Medical certificate expiration

- Number of days until expiration

Driver monitoring

- Drivers by state

License status

- Active and suspended/revoked licenses

Additional data, including license type, driver age, tenure, and body mass index (BMI)
