# Overview: RestorationManager™

# Increase your profits through better job management

## Restoration Manager
The essential job management tool for anyone working in property restoration. It's rich with custom system settings, a control dashboard, task management, and document and signature capture.

## Job management
Never lose track of any aspect of your restoration job with tools to keep everything on track and up to date.

- Track images, documents and correspondence

- Create tasks and follow-up reminders

- Automate emails to your customers with data specific to their job

- Build work orders directly from Xactimate line items

- Schedule your jobs using Gantt scheduling

## Job costing
Get accurate, detailed views of expenses throughout each job to stay on budget.

- Track detailed costs by job

- View estimate vs budget vs actual

- Calculate line item budgets automatically

- Integrate with QuickBooks, QuickBooks Online, Sage 50, Sage 100 Contractor, Sage 300 and more

## Equipment management

Reduce losses resulting from misplaced, overdue, and unmaintained equipment.

- Track equipment costs by job

- Barcode and scan equipment on jobs

- Reminders of equipment overdue and due dates

- Receive alerts for maintenance

**Reporting**

Gain insights for honing your operation and produce relevant reports for customers, insurers, and other interested parties.

• More than 120 built-in reports

• Set up reports to be emailed to you on a schedule you determine

• Save your favorite reports for easy access

**Field ready**

Restoration Manager is a powerful tool for your field personnel that allows better communication with customers and trades and enhances overall customer satisfaction - in the field and on the go.

Available for Apple and Android mobile devices.

• Capture signatures

• Create jobs and add work orders

• Check in and check out equipment

• Add job notes and images

• Update job claim status

• View and update information for each customer

**Dashboard insights for better decisions**

How many repairs do I have in production? Who has referred me the most jobs this year? When is my equipment due back? What is my most profitable repair type?

The Restoration Manager dashboard answers all of these with a quick glance.

Use the intuitive dashboard to examine:

• Report performance by office or by division

• Job progress summaries

• Project manager performance

• Estimator performance

• Profit and loss analysis

• Equipment summaries

• And more
