

Features: RestorationManager™

Desktop and Mobile Job Management Tools

Developed specifically for restoration specialists, Restoration Manager comes packed with all the tools and features you need to increase your efficiency, reduce costly mistakes, and deliver a customer experience that delights.

- Track jobs from start to finish
- Integrate with most major financial software
- Nurture relationships with built-in CRM tools for sales and marketing

Partner management portal

Share job status and more with referral sources and partners.

Let your referring parties submit jobs and view current job information through a dedicated online portal.

Using the portal your partners can:

- Receive a custom welcome message on their first visit
- View all jobs they have referred
- Easily add new jobs
- View documents, correspondence, and pictures related to a job
- Get answers to frequently asked questions
- See key company contacts

Equipment Tracking

Use your mobile device to scan and track.

Never lose equipment again. Assign and track equipment using the camera on your mobile device or Bluetooth scanner, or entering by hand.

With Restoration Manager, you can also:

- Create profiles for each piece of equipment
- Get notified when equipment needs maintenance
- View current utilization
- Run detailed usage and profitability reports

Homeowner Portal

Give your customer a window to the work.

Keep your customers involved. A homeowner portal lets homeowners view important information about the restoration project. Your customers will appreciate the extra transparency and will find better overall satisfaction with your service.

Your customers can use the homeowner portal to:

- Receive a custom welcome message on their first visit
- View documents and pictures related to the job
- View correspondence you have made available to them
- Get answers to frequently asked questions
- See key company contacts
