

Integration and Automation Solutions

Start with Touchstone and Touchstone Re APIs

Client-driven, client-developed

Tailor risk management workflows for Touchstone(re) based on your organization's specific business needs:

- Expand the application of Verisk's catastrophe modeling within your enterprise while reducing training requirements
- Embed catastrophe modeling directly into an existing risk management workflow

Enhance with Verisk-configured
Automated Solutions

Verisk-driven, developed in collaboration with our client

Underwriting Workbook

User-driven, Excel-based interface for automated per-contract import and analysis for extreme events

Best for: Catastrophe modelers and underwriters (insurance)

Smart APIs

The power of Underwriting Workbook expanded and amplified through integration with your in-house systems

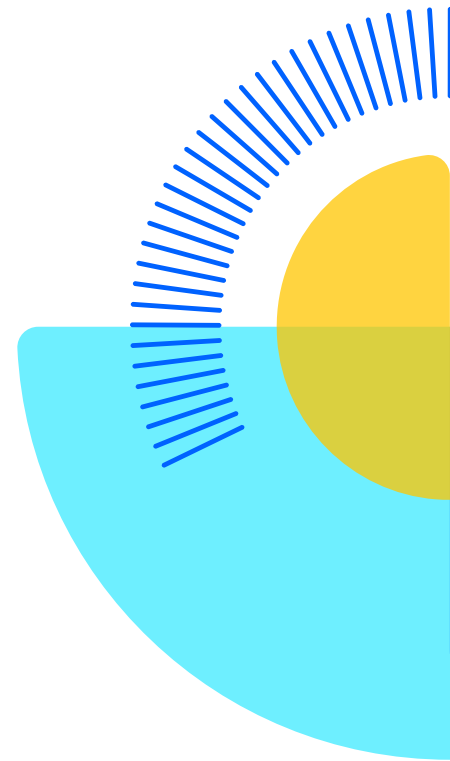

Best for: Catastrophe modelers and underwriters (insurance)

Touchstone Reinsurance Workbook

Automated attachment, upgrade, and registration of CEDE databases plus multiple views of exposure with an Excel-based interface for easy analysis

Best for: Catastrophe modelers and underwriters (insurance)

Workflow Builder

Cloud-based application lets you “build your own” workflows for automation from a single contract to the portfolio level, reducing or removing tedious and repetitive tasks

Best for: All job functions and industries

Web Services/Risk Assessment APIs

Modeled loss results generated in seconds from location-level information, with no need for additional input at the point of sale

Best for: Underwriters (insurance)
