

XactLink

**Stop using email.
Start getting paid faster.**

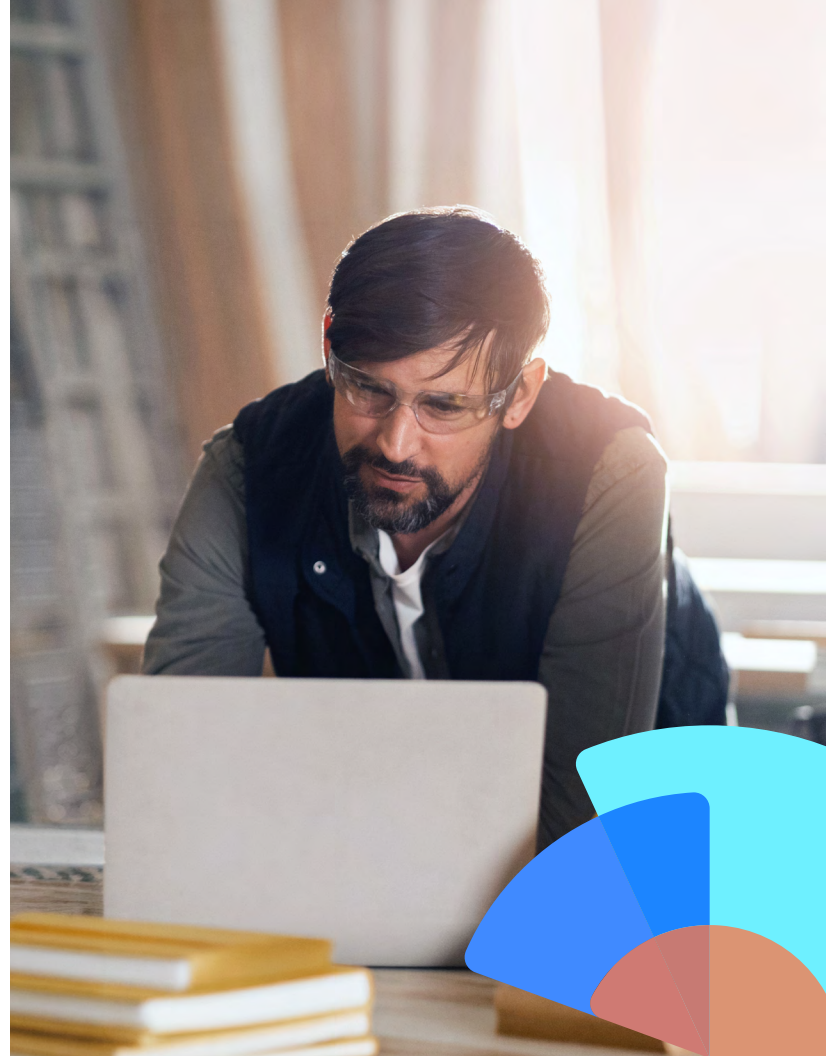

Submit estimates directly from Xactimate to the carrier's workflow and take back the hours you lose to email.

The problem you're living every day

- Export from Xactimate, build a PDF, assemble photos and docs, then compose emails by hand.
- Hit attachment limits, split files across multiple emails, and repeat the process with every revision.
- Wait days or weeks with no status and no visibility into where your estimate stands.

What XactLink does

- Lets you build estimates exactly as you do today in Xactimate. No new system to learn.
- Submits estimates, photos, and documents directly into the carrier's XactAnalysis queue from Xactimate, not email.
- Gives you real time status (pending, accepted, declined) and in platform messaging with the adjuster.

Key benefits for contractors

Less admin, more production

Save 60–135 minutes of non billable time on every non program estimate.

Faster cash flow

Shorten the time from estimate to payment by one to two weeks on typical non program jobs.

You stay in control

Choose exactly what data to share; carriers can request changes but cannot edit your estimate directly.

Better data over time

See what carriers actually accept at what rates so you can write estimates that move faster.roughly 1-3 hours per claim—just to understand what was submitted.

Built for how you already work

Native in Xactimate.

If you use Xactimate, you're ready for XactLink.

No new logins or complex onboarding.

There is minimal training for your team.

Get started

Submit your next non program estimate through XactLink and see the difference in follow up and payment time.

Bring nonprogram claims out of your inbox.
