

XactPulse

Know where you stand. Every single day.

Built inside XactInsights™, XactPulse™ gives real-time visibility into how your claims operation compares to the rest of the industry.

You have the data. Getting answers from it is the hard part

Reports take 20–40 hours a month to pull together. Data lives in too many systems to see the full picture. And by the time a report lands, the moment to act has passed.

A clearer view of your performance, ready when you are

XactPulse benchmarks your claims performance against industry peers in real time, powered by the most comprehensive property claims dataset in the industry. No new platform to learn. No waiting on quarterly reports. No guessing.

The fastest path from data to better decisions

30+ performance metrics

Standardized KPIs across estimating, cycle time, quality, and outcomes—the numbers that move the business.

See where you stand against your peers

Benchmark against carriers your size, your operations peer group, or the full U.S. industry. Filter by peril, state, and policy type.

Real-time visibility

Data refreshes daily, so you walk into meetings with answers, not an outdated PDF.

Drill down to the why

Move from headline KPI to root cause in a few clicks. Stop asking what changed. Start understanding why.

40%

greater operational
efficiency for carriers
using BI reporting

30+

benchmarked KPIs,
updated daily

20-40 hrs

of manual reporting
eliminated every month

estimates for mid-tier carrier teams.

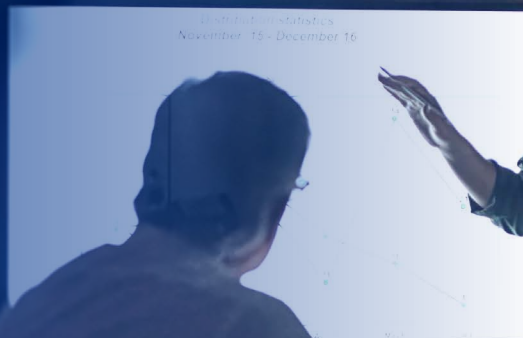

When you need more than a dashboard

Numbers tell you what's happening. We can help you understand why—and what to do next. Available to XactPulse Pro and Elite subscribers, Verisk's business intelligence team analyzes your data trends, puts them in the context of broader shifts across the property claims landscape, and works alongside your team to turn those signals into focused, prioritized actions.

The benchmark only Verisk can build

XactPulse is built on the industry's most comprehensive property claims dataset, drawn from decades of real estimating data across carriers of every size. The same foundation behind the price lists the industry already trusts.

Dashboard-only tools can't replicate it. Consulting-only firms can't deliver it in real time. **We do both.**

Choose the level of insight that fits your team

Features	Essentials	Pro	Elite
Live peer and industry benchmarking	•	•	•
