1. To review emissions from prior years, please visit Verisk's Resources and Reporting Hub to find the archived Corporate Responsibility reports for the corresponding periods.
2. We engaged an independent third party to provide external limited assurance (review) over these specific 2025 GHG emissions metrics, and their Report of Independent Accountants as well as our management assertion can be found here. Assured categories include divested entities in the corresponding calendar year – more information can be found in "Notes" below.
3. The following Scope 3 categories are not relevant to Verisk as a professional services company and are therefore not included in the table: Category 9: Downstream Transportation and Distribution, Category 10: Processing of Sold Products, Category 11: Use of Sold Products, Category 12: End-of-Life Treatment of Products, and Category 14: Franchises.

4. In 2024, Verisk began calculating additional relevant Scope 3 categories for FY2022 in conjunction with our commitment to set near-and long-term company-wide emission reductions in line with science-based net-zero with the SBTi. In 2025, the SBTi approved Verisk's near-and-long-term science-based emissions reductions targets and has verified Verisk's net-zero science-based target by 2050. The 2022 and 2023 data for these categories do not include emissions associated with Wood Mackenzie, which was divested February 2023. These categories are not covered by the limited assurance noted in footnote 2 above.
5. In 2026, Verisk began calculating Category 8, Upstream Leased Assets for FY2025. In prior years, this category was not relevant to Verisk's operations.
6. Category 3: Fuel and Energy Related Activities - includes all Verisk's well-to-tank emissions.
7. Offsets are only applied to assured categories.
8. All values in the table are rounded to the nearest whole number.

Notes: The organizational boundary for each year covers 100 percent of the units then conducting business within the Verisk family of companies, unless otherwise stated. Divestitures and acquisitions were addressed as follows:

- The 2021 emissions of five companies acquired by Verisk were added for the months indicated: Jornaya (January - December), Whitespace (April – December), Roskill (July – December), Ignite (September – December), and Data Driven Safety (December).
- The 2022 emissions of three companies acquired by Verisk were included in the inventory for the months indicated: ACTINEO (January – December), Infutor (February – December), and Opta (March – December). The 2022 emissions of two companies divested by Verisk were included in the inventory for the months indicated: Verisk 3E (January – February) and Verisk Financial (January – March). The 2022 emissions of Wood Mackenzie were included in the inventory for Scopes 1, 2, 3 – Business Air Travel and Downstream Leased Assets: Verisk divested Wood Mackenzie during 2023.
- The 2023 emissions of three companies acquired by Verisk were included in the inventory for the months indicated: Morning Data (June – December), Krug Sachverstandigen (May – December), and Mavera (March – December). The 2023 emissions of one business divested by Verisk were included in the inventory for the months indicated: Wood Mackenzie (January).
- The 2024 emissions of one company acquired by Verisk were included in the inventory for the months indicated: Rocket (February – December). The 2024 emissions of one business divested by Verisk were included in the inventory for the months indicated: AER (January – November).
- The 2025 emissions of one company acquired by Verisk were included in the inventory for the months indicated: Surance Bay (July – December).

Market-based Scope 2 Energy Consumption (MWh)

The following table displays the percentage of Verisk's reported market-based Scope 2 energy consumption attributable to renewable sources. Renewable sources include market-based instruments such as renewable energy certificates (RECs), as well as certified renewable electricity.

	2021	2022	2023	2024	2025
