Most Severe Wind (1/1/09 to today)	17-Jun-16	70	< 1	70	< 1	70	< 1

** Additional wind events occurred at the location prior to the earliest event shown
 ** If additional history is needed, please contact support at 781-761-2305

Estimated wind gust values reflect the maximum value on the calendar day. Estimated wind duration of 50 mph or greater represents the cumulative amount of time in hours over the calendar day that wind gust reached or exceeded 50 mph. The most severe wind event is the date with the highest estimated wind gust.

Benchmark® Wind History Report

Description of Wind Measurements

Damaging weather values

Measure	Units	Description	High	Typical	Low
Estimated Duration of Wind Gust $\geq$ 50 mph	Hours	Estimated cumulative time within a 24 hour period when straight-line (i.e., non-tornadic) wind gusts at 10 meters above ground level are 50 mph or greater	1-3 hours	< 1 hour	0
Estimated Wind Gust	Miles per Hour (MPH)	Estimated maximum 3-second peak wind gust at 10 meters above ground level from straight-line (i.e., non-tornadic) winds, such as thunderstorms, frontal passages and winter storms (excludes tropical cyclones).	$\geq$ 50 mph	-	< 35 mph

Benchmark® Weather History Reports

Benchmark® data has been demonstrated to align with the occurrence of severe weather. We regularly review its accuracy and calibrate our algorithms using industry claims data and other sources of ground-truth to maximize performance. Benchmark® processes high resolution datasets from sources such as radar, numerical weather models, and lightning networks using models and proprietary algorithms developed by our advanced-degree meteorologists and scientists. We ingest data from the WSR-88D radar network incorporating polarimetric variables to derive the most accurate representation of the weather. At Verisk, we create hazard indices that specifically pertain to the insurance industry and their service partners.

Verisk provides software, data, and analytics for enterprise weather risk management. Insurers can apply these solutions to help improve customer service, achieve more accurate risk selection, and reduce claims cycle time. Manufacturers, distributors, and retailers rely on Verisk to accelerate revenue growth through more accurate forecasts of product demand and to promote stable operations by helping mitigate supply chain risk.
