Benchmark® Hail History Report

Description of Hail Measurements

Damaging weather values

Measure	Units	Description	High	Typical	Low
Probability of severe hail	%	Indicates the likelihood that severe hail fell on that day. 70% indicates a very high certainty severe hail occurred, 50% high probability, 30% possibly severe hail occurred, and 10% low probability severe hail occurred.	70%	-	10%
Estimated Size of Hail	Inches(Diameter)	0.75" is lower boundary of hail size that causes property damage. Typically damaging hail ranges from 1-4" diameter. Approx. sizes: 3/4" dime; 1" quarter; 1.5" ping pong ball; 1.75" golf ball; 4" grapefruit; 4.5" softball.	1-4"	< 1"	< 0.75"
Wind Speed	Miles per Hour(MPH)	Estimated maximum (3-second) peak gust wind speed at 10 meters above ground level from straight-line (i.e., non-tornadic) winds, such as thunderstorms, frontal passages and winter storms (excludes tropical cyclones).	> 50mph	-	< 35mph

Benchmark® Weather History Reports

Benchmark® data has been demonstrated to align with the occurrence of severe weather. We regularly review its accuracy and calibrate our algorithms using industry claims data and other sources of ground-truth to maximize performance. Benchmark® processes high resolution datasets from sources such as radar, numerical weather models, and lightning networks using models and proprietary algorithms developed by our advanced-degreed meteorologists and scientists. We ingest data from the WSR-88D radar network incorporating polarimetric variables to derive the most accurate representation of the weather. At Verisk, we create hazard indices that specifically pertain to the insurance industry and their service partners.

Verisk provides software, data, and analytics for enterprise weather risk management. Insurers can apply these solutions to help improve customer service, achieve more accurate risk selection, and reduce claims cycle time. Manufacturers, distributors, and retailers rely on Verisk to accelerate revenue growth through more accurate forecasts of product demand and to promote stable operations by helping mitigate supply chain risk.
