

XactRestore

All-in-one restoration job management software

XactRestore™ streamlines your workflows while delivering greater pricing precision and control. Pull estimates directly from Xactimate® and manage projects, documents, and job data—all in one place. Less toggling between tools, more time on the job.

XactRestore Standard

Base features and capabilities

Xactimate integration

Import your Xactimate data to streamline your workflow and reduce manual data entry. (Pro users can pull estimates directly from Xactimate.)

Restoration-specific pricing categories

Access restoration-specific pricing, including mold remediation and water mitigation items, to create accurate estimates faster.

Identify type of loss

Associate the type of loss and cause of loss to a project to better track what work is being done.

Key project milestone insights

Track key milestones from the summary page. Date and time stamping supports compliance and gives real-time job visibility.

XactRestore Pro

Advanced tools for growing your restoration business.

Includes all Standard features.

Field documentation

Capture moisture readings, track equipment, and generate field reports from any mobile device.

Digital document signing

Eliminate paperwork delays with built-in digital document signing. Get signatures in the field and keep projects moving without waiting for forms.

Centralized document management

Attach and store document files to your project for better storage and management of all project data in one place.

Advanced line-item editing

Edit the underlying assembly data for any line item in the pricing database with greater precision and control.

Auto-scheduling

Streamline project management by automatically generating a project schedule once an estimate is created.

Hover integration

Automatically import floor plan models directly from Hover.

Client and vendor management

Keep projects on track with a dedicated CRM tab for managing client and vendor communication in one place.
