

XactRestore Pro

Advanced tools for growing your restoration business

Streamline your restoration workflows while delivering greater pricing precision and control. Pull estimates directly from Xactimate® and manage projects, documents, and job data—all in one place.

Precision Estimating

Improve estimate accuracy with an expanded set of pricing categories, including specialized water mitigation and remediation items.

AI Estimator

Connect with XactAI™ to build estimates with simple AI-powered natural language prompts.

Floorplan Integration

Turn 2D floor plans into 3D renderings and automatically generate line items based on dimensions.

Xactimate Integration

Seamlessly connect to streamline your workflow and pull estimates directly from Xactimate.

Field Documentation

Capture moisture readings, track equipment, and generate field reports from any mobile device. Integrates with third-party tools and remote sensors.

XactAnalysis® Integration

Eliminate manual data entry and save time by sending and receiving data to and from XactAnalysis.
