

Verisk Academy

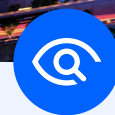

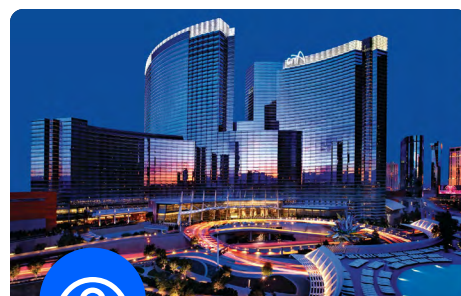

Benefits for your team

Impact on our organization

The insurance industry is shifting toward faster, more data-driven decision-making. To stay competitive, we need talent who can not only understand data, but translate it into clear recommendations that drive underwriting, claims, operations, and business strategy.

Verisk Academy develops these skills in a high-impact, flexible format that accelerates readiness and performance that matter today and in the decades to come. Together, we will future-proof our team and organization.

I'd appreciate your approval to register for the upcoming cohort. I'm confident this program will elevate my contributions and support our team's success.

Data and analytics expertise for emerging insurance talent

This is a four-week blended program that kicks off at the [Verisk Insurance Conference \(VIC\) in Las Vegas](#). Reserve team seats early to ensure availability and maximize bundle discounts!

Reserve now

Business outcomes

By sponsoring my participation, you'll see measurable benefits on our team:

Stronger decision-making

I'll learn frameworks to interpret data, challenge assumptions, and present clear, actionable insights—improving the speed and quality of decisions we make.

Improved communication with senior leaders

I'll build confidence and skill in communicating analytic recommendations to underwriters, executives, and cross-functional stakeholders, reducing friction and increasing alignment.

Applied skills for day-to-day work

The curriculum is built around real insurance datasets and industry scenarios, so the skills immediately translate into higher-value contributions on key projects.

Enhanced productivity and efficiency

With a stronger grounding in analytics, storytelling, and data governance, I'll complete analyses faster, avoid rework, and contribute more effectively across our workflows.

Greater cross-functional collaboration

I will network with rising talent across carriers, brokers, MGAs, and Verisk itself—creating relationships and shared language that strengthen how we partner across the ecosystem.

What the program includes

A complete capability-building experience

Cohort seats are capped and fill quickly. With the insurance industry's talent and analytics gap widening, this is an opportunity to develop the capabilities our organization needs—before demand outpaces supply.

Structure

WEEK 1

March 23-24

Kickoff in person at VIC (Las Vegas)

WEEK 2

March 31-April 2

Live virtual instruction

Tuesday, March 31	12 - 4pm ET

* Travel costs not included in registration price

Core skills acquired

- Data storytelling
- Analytic thinking & framing
- Data governance fundamentals
- Visualization & communication
- Insurance data ecosystem fluency
- Decision-making frameworks
- Future-focused skills (AI, emerging trends)

Accreditation and credentials

This benefits not just me, but our team's credibility and capability. My participation earns recognized, resume-building credentials:

- 24 CEU credits (CAS / CPCU eligible)
- Elective credits toward CIDM/ADMA (IDMA)
- Digital badge for LinkedIn
- Official Verisk Certificate of Completion

Pricing & team packages (in USD)*

Team enrollment is the most cost-effective path and ensures shared learning across functions. Includes all in-person and virtual sessions, cohort meals, materials, CEUs, and credentials.

- **Package A:** \$5,000 for one attendee
- **Package B:** 2 attendees for \$7,500
- **Package C:** 3 attendees for \$10,000
- **Package D:** 4 attendees for \$12,000 EM
- **Package E:** 5+ attendees at \$2,500 per person

* Note: travel is not included in the registration cost.

Return on investment

This investment accelerates my development and directly improves the value I bring to our team.

- Faster, clearer insights for leadership
- Higher-quality analytics and recommendations
- Increased readiness for expanded responsibility
- Strengthened pipeline of future leaders
- Alignment with industry best practices
