

## Saurabh Khemka

### President

#### Commercial Lines

Saurabh Khemka is president of commercial lines underwriting solutions, overseeing product development for Verisk's commercial lines rating products for insurance customers. Saurabh's team provides crucial information and insight to help insurers create and customize insurance products and determine pricing through loss costs, policy forms, and underwriting rules solutions.

He also leads the modernization of Verisk's core lines product for personal and commercial lines, seeking to deliver increased value to our customers through new data and analytics as well as new ways of delivering and interacting with our products.

Saurabh also manages Verisk's Telematics and Internet of Things (IoT) division, where he has grown the Verisk Data Exchange™ into a leading IoT/telematics platform. The Exchange aggregates data from millions of connected devices, including numerous automotive and property-based data sources, and uses AI/machine learning methods to produce products and insights that drive usage-based insurance solutions.

Previously, Saurabh was senior vice president and general manager for the Telematics and Internet of Things (IoT) Solutions division and head of strategy and business operations.

Before joining Verisk, Saurabh was a principal at management consulting firm Bain & Company, where he focused on private equity and corporate mergers and acquisitions, technology and media, and consumer products.

Saurabh holds an MS in electrical engineering and computer science and an MS in engineering systems, both from the Massachusetts Institute of Technology (MIT), and a BS in mathematics/computer science from Concord University.
