

Securely capture claims statements on-the-go

ROBUST DATA POWERFUL ANALYTICS BETTER DECISIONS

Balancing speed and precision is vital to improving claims management. Our trusted solutions leverage quality data and leading analytics to support the best customer experience and enhanced results.

INNOVATIVE TECHNOLOGIES
AI, machine learning, predictive analytics, RPA, digital forensics, and more

DEEP DATA
14PB of data, including a proprietary claims database containing 1.4B+ records

COMPREHENSIVE SOLUTIONS
30+ solutions across the life of a claim and for every line of business

TRUSTED SECURITY
Nearly 50 years protecting insurer data

UNPARALLELED INDUSTRY EXPERTISE
5K+ experts in claims management, data science, compliance, medicine, law, and more

Get automatic transcriptions of every interview

Digitally recording an interview and having the file manually transcribed is often inefficient, adds costs to the claims process, and isn't always secure. The ISO Mobile Recorder app improves the process by securely capturing, storing, and automatically transcribing audio files—providing a virtual one-stop mobile solution for claims professionals.

Improve efficiency with automation

The ISO Mobile Recorder app simplifies the claims process by:

- Providing flexibility to record individual interviews at any time and location
- Securely sending files to ISO for automated transcription and storage
- Creating and hosting a searchable and indexable text file
- Autogenerating an email with a transcribed PDF and statement MP3 file

A Verisk Business

Save time and streamline investigations

SIU, adjusters, and industry professionals can use ISO Mobile Recorder to:

- Speed up the investigation process
- Increase the quality of audio recordings
- Store and upload statements via the cloud
- Access a centralized repository for recordings
- Seamlessly integrate with claims and case management systems

The ISO Mobile Recorder app is easy to use. Just download the app from the iOS App Store and get started.
