

Eliminate the Administration Frustration After Settlement

Managing payments can be overwhelming, especially after an accident. That's why we created the CareMDRx program—to help when people need it most.

CareMDRx was designed to provide unprecedented clarity, efficiency, and savings in the difficult to navigate post-settlement healthcare system. The best part? The Medicare beneficiary saves by accessing networks they otherwise would not be entitled that stretches out their funds available for medical services.

Using our unrivaled access to existing medical and pharmaceutical networks, CareMDRx's proprietary technology platform provides several useful benefits to Medicare beneficiaries, people soon to be enrolled in Medicare, or individuals personally responsible for their medical, pharmacy, and durable medical equipment expenses.

CAREMDRX PROVIDES CLIENTS:

A healthcare savings card used by the patient at the doctor or to access network prescriptions and medical equipment

A secure 24/7 online portal for bill management and review with unprecedented beneficiary visibility

Understanding of what treatment is covered by the set-aside account versus Medicare

Negotiation with CMS for any coverage issues on behalf of the beneficiary to determine responsibility

Review of the beneficiary's bills for accuracy and payment at the lowest possible cost

Submission of any reports that must be sent to Medicare each year (when applicable)

CareMDRx program features three levels of service options designed to fit any client's needs.

Professional Administration Service

Our Professional Administration Service manages all settlement funds through a bank account set up and controlled by the CareMDRx system. We designed this service for individuals who are currently a Medicare beneficiary or becoming a Medicare beneficiary in the next 30 months. This service manages money from the settlement, getting the claimant the most out of their Medicare benefits while preserving the funds in their set-aside account for future medical expenses.

Assisted Administration Service

Our Assisted Administration Service is designed for claimants who want to hold on to their settlement funds in a bank account the claimant controls. This service is available to individuals who are currently a Medicare beneficiary, expected to become a Medicare beneficiary in the next 30 months, or not a Medicare beneficiary now or in the next 30 months.

ISO Claims Partners

is uniquely positioned to help you achieve compliance and cost savings with our legal, medical, and technology expertise.

INSIGHTS

- Data from more than 1 billion industrywide claims
