

Discovery Navigator

# Discovery Navigator is revolutionizing information collection

## Insurance Automation *From Policy through Claim*

- AI, machine learning, and predictive analytics increases speed and precision
- 19 petabytes of data across proprietary databases yields greater accuracy
- Ecosystem of integrated solutions improves customer experience – yours and theirs
- 5,000+ industry experts provides lift across the value chain
- 50+ years safeguarding insurers' data earns confidence

## Capture critical medical data with ease

Getting a complete picture of the medical history and pertinent data relative to a claim is critical to successful resolution. Traditionally, it has taken substantial resources to get this key data out of unstructured medical records.

The Challenge:

- Manually retrieving actionable medical information is inefficient
- Medical bills do not capture visit information

## Discovery Navigator automates this important information

We have developed Discovery Navigator that automates the retrieval of medical information through sophisticated AI. The solution pulls key data from medical records and provides clients with the information they need in a format that can be easily reviewed and uploaded into their claims management system.

---

## Boost Your Team's Efficiency

Obtain actionable medical information from hundreds of files in hours

---

### Discovery Navigator Service Components

Our service provides a solution for organizations that need to pull key data from a medical file.

Key features of the service include:

- automated extraction of key medical information from patient files
- identify information like ICD Codes, medications, comorbidities and more
- term tagging to allow filtering by type of medical term
- identified information available in an easily uploaded table or document
- customized development of features and capabilities to further streamline the medical record review process

### Select terms Discovery Navigator identifies:

Body Parts

Prescription Drug  
Information

Comorbid  
conditions

Diagnosis  
codes
