→ 5,000+ industry experts provides lift across the value chain

→ 50+ years safeguarding insurers' data earns confidence

Start-to-finish MSP solutions for liability claims
Medicare Secondary Payer (MSP) compliance presents complex challenges when handling liability claims, and you need to plan carefully to gain sufficient protection from potential exposure. As an industry leader, we offers a complete suite of tools and services to cover all your compliance needs for liability claims.

Rely on the best MSP compliance team
We have a team of attorneys with experience on both the plaintiff and defense sides of liability matters—and a comprehensive knowledge of complex litigation and claims coverage issues. For Section 111 reporting, conditional payments, and the complicated issue of future medical allocations, liability claims payers need MSP strategies to minimize risk and move claims quickly toward resolution. Whatever type of liability claim you're dealing with—from automobile tort to mass tort, from medical malpractice to ingestion or exposure claims—we'll help you navigate the complex maze of MSP compliance.

We offer a full suite of services to help you meet the MSP challenge in liability cases, including:

- MSP Navigator®
- Conditional Payment Compliance
- CP Link®
- Liability Medicare Set-Asides (LMSA)
- Protocol Design
- Settlement Consultation Services

MSP Navigator®
MSP Navigator® is a highly accurate Section 111 reporting solution supported by our team of legal and medical experts. The solution not only reports data but also provides CMS compliance analytics.

Conditional Payment Compliance

Our team of legal and medical experts has developed a broad range of conditional payment services regarding the U.S. Department of Treasury, Medicare Advantage, and Medicaid to facilitate seamless, worry-free compliance while reducing costs.

CP Link®

Integrated into your Section 111 data reporting system, CP Link® automatically identifies Medicare beneficiaries and initiates the Medicare conditional payment compliance process. Since every claim is checked, compliance gaps are reduced to assure full CMS compliance.

Liability Medicare Set-Asides

Effective MSP compliance calls for a combined medical and legal approach to make sure you pay for only what is necessary—and nothing more. Our experienced team of professionals calculates a future medical allocation for cases in which an LMSA is necessary.

Protocol Design

Our Protocol Design service provides claims handlers and counsel with crucial education and training to assess and improve your current MSP compliance practices, MSP reporting, conditional payments, and Medicare Set-Asides. Your staff will learn to develop practical compliance protocols based on the MSP statute, your objectives, and your tolerance for risk.

Settlement Consultation Services

Our team of medical and legal experts can remove obstacles to closing complex claims. We'll help identify a book of claims to tackle, coordinate settlement conferences, and expedite preparation of MSAs or conditional payments. You'll achieve large-scale claims resolution from a concentrated, time-efficient effort.
