- Ecosystem of integrated solutions improves customer experience – yours and theirs
- 5,000+ industry experts provides lift across the value chain
- 50+ years safeguarding insurers' data earns confidence

Don't settle for excess damages

Medical damage demands on liability claims are often based on the worst-case scenario, assuming all medical treatment is necessary and related to the accident. It can be difficult to push back against these demands because the cases are often so complex.

Receive a full analysis to help resolve complicated medical claims

We give you peace of mind when it comes to settling medical damages. Our Liability Nurse Review unravels complicated medical claims and provides analysis to assist against excessive damages. Depending on the program that you choose you'll get either a snapshot or a full review of records from one of our experienced Registered Nurses. The report provides objective analysis and opinion regarding the necessity of treatment and recommendations rendered, along with literature to support the findings.

Liability Nurse Review offers two options:

1. **Standard program** featuring a full review of all records and includes bill review (if requested)
2. **Snapshot program** perfect for answering a specific case question

Protect yourself against excessive damages

The Liability Nurse Review is designed to provide what clients need to protect themselves against excessive damages. Based on those needs we've created two options:

The Liability Nurse Review Snapshot Program is for those who are looking for information specific to a case question.

This includes:

- An objective analysis of requested treatment for medical necessity and relatedness
- The guidelines to support the opinion rendered
- A brief synopsis of what occurred to aid in identifying any discrepancies
- An overview of findings of the injured party based on the available records
- A streamlined, efficient workflow through integration with Liability Navigator®, a solution that helps achieve consistent and accurate injury evaluations
- A 10-day turnaround time
- Program oversight by Director and SVP

Liability Nurse Review Standard Program is available if you seek a deeper review of records and bill information. This solution includes all of the components of the snapshot program, plus:

- A full chronology of relevant medical records
- A review of the treatment bills for relatedness and provides usual and customary pricing when available (if requested)

Why get a Liability Nurse Review?

Objective Analysis

Additional Recommendations

Lower Damages
