Section 111 Compliance Services

Effectively Manage Every Step of Your Section 111 Compliance Program

Section 111 Compliance Services

Running a tight compliance ship is difficult when CMS regulations are regularly changing. The stakes are high with potential Section 111 civil money penalties of up to $1,000 per day (adjusted for inflation yearly). Don't take chances – rely on Verisk for a fully-supported program that ensures Section 111 compliance and helps mitigate costs.

MSP Navigator®

Meet your Section 111 reporting obligations accurately and easily. This robust MSP (Medicare Secondary Payer) management tool provides clear visibility into Section 111 reporting and MSP compliance and risk avoidance. The intuitive, customizable, and user-friendly interface helps you proactively manage compliance while saving time and ensuring accurate reporting. Flexible integration options are available including EDI, XML, and API integrations with a majority of leading claim systems.

As the premier Section 111 reporting tool, MSP Navigator® proactively handles compliance in a way that:

- considers your organization's systems and claim-handling procedures
- minimizes intrusion into adjuster time and workflow
- saves time while ensuring error-free submissions to the Centers for Medicare and Medicaid Services (CMS)

Seamlessly integrate MSP Navigator with CP Link® for a customized data-aggregation system that extracts Section 111 data from a variety of sources and automates the conditional payment process. MSP Navigator is the best answer to your Section 111 compliance challenges, regardless of the size of your organization. You'll get efficient, full-service Section 111 reporting and eliminate the risk of costly noncompliance fines.

Insurance Automation
From Policy through Claim

→ 50+ years safeguarding insurers' data earns confidence

For Section 111 claims reported to cms through MSP Navigator 99.9 percent contains ZERO errors.*

*based on 2023 data from nearly 5,000+ RREs and 200 million claimants' queried.

MSP Analyzer®

MSP Analyzer provides a real-time analytic dashboard of your Section 111 Reporting program that Simplifies oversight and management of Section 111 Data. Access to MSP Analyzer is available with an MSP Navigator® subscription. Maximize your Section 111 reporting capabilities and gain actionable insights into your holistic Medicare Secondary Payer (MSP) compliance program to mitigate risk. The result: settle claims efficiently, accurately, and with confidence.
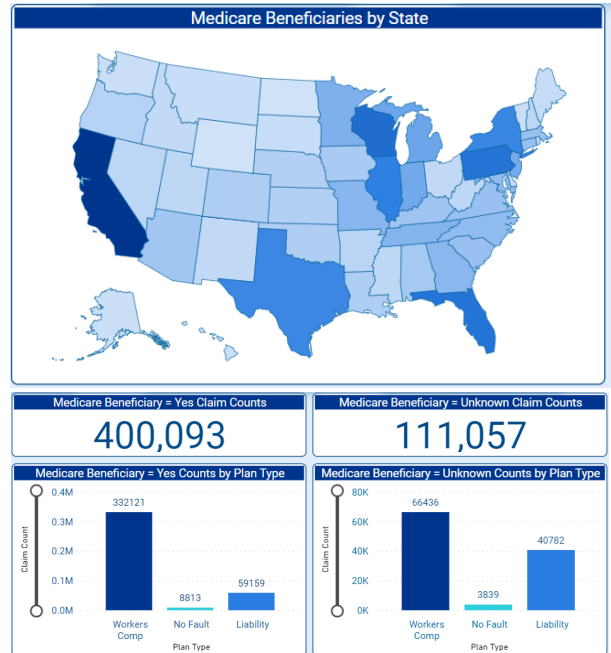

Section 111 Audit

A comprehensive report with detailed recommendations helps you assess your Section 111 compliance practices and helps you identify and rectify any deficiencies in your process. The Section 111 Audit examines all key points of your Section 111 reporting process including obtaining query data, submitting queries, evaluating query responses and more.

We will fully evaluate your compliance program to:

- assess your compliance with Section 111 and identify potential areas of improvement

- identify opportunities to reduce demands on your claims staff

- avoid costs associated with Medicare compliance actions

- reduce loss costs to proactively

Medicare Instant Eligibility Check

There are instances when it is necessary to understand a Medicare eligibility status immediately in lieu of waiting for the monthly query response from CMS. When this occurs, we suggest our Medicare Instant Eligibility (MEI) Check. This is an off-cycle query to quickly determine an individual's Medicare status and verify whether they are a Medicare beneficiary. This quick and easy process ensures that you will have all necessary entitlement information to manage your claim without any delay.

Missing Data Smart Search

helps identify required claimant information, including SSN and DOB.

Missing Data Smart Search

Utilize this fast and accurate add-on service to enhance Section 111 reporting compliance. It can be a challenge to obtain claimant date of birth and social security number, both required fields to query for Medicare eligibility. With Missing Data Smart Search, claims missing these data points are automatically run through a public records search to capture matching dates of birth and social security numbers. Results are returned securely and may be integrated into your claim system for one system of record. Reduce your claimant outreach efforts, pay only for matches returned and ensure compliance on every file with this new feature.
