

Launch new EDI reporting initiatives with ease

ROBUST DATA POWERFUL ANALYTICS BETTER DECISIONS

Balancing speed and precision is vital to improving claims management. Our trusted solutions leverage quality data and leading analytics to support the best customer experience and enhanced results.

INNOVATIVE TECHNOLOGIES

AI, machine learning, predictive analytics, RPA, digital forensics, and more

DEEP DATA

14PB of data, including a proprietary claims database containing 1.4B+ records

COMPREHENSIVE SOLUTIONS

30+ solutions across the life of a claim and for every line of business

TRUSTED SECURITY

Nearly 50 years protecting insurer data

UNPARALLELED INDUSTRY EXPERTISE

5K+ experts in claims management, data science, compliance, medicine, law, and more

Workers' comp data is tough to manage

More states are taking advantage of the benefits of Electronic Data Interchange (EDI) reporting for workers' compensation claims and medical data collection. But whether they're launching a new EDI reporting initiative or transitioning to a different IAIABC release, the process can be time-consuming and complex. From registering trading partners, to testing the system, to collecting data—implementing a new release is difficult. But hiring an experienced vendor to manage the complexity can relieve the burden.

Simplify EDI processes for your state

wcCapture™ is a claims and medical data collection and compliance solution that makes it easier for states to launch new EDI reporting initiatives. It allows states to:

- collect insurers' first reports of injury (FROI) and subsequent reports of injury (SROI) in an efficient and cost-effective manner
- get medical information needed to set accurate medical fee schedules, identify potentially fraudulent activity, and implement medical cost containment strategies
- transition to and implement different IAIABC releases

A Verisk Business

Evaluating claim data reporting uncovers potential compliance issues

With all the workers' compensation data that states collect and insurers report, how do you measure the effectiveness of your compliance? Regulators need metrics about industry standards to discover where problems lie.

Analytic that drive change

To assist states, we also offer wcAnalyzer™, which is a workers' comp analytics system that helps states turn untapped data into actionable insights.

Compliance Data Mart — evaluates the EDI data reporting and compliance performance of all insurers writing business in your jurisdiction and identifies areas of concern.

Claims Data Data Mart — helps produce state annual reports, uncover business trends, and adjust state workers' comp programs based on qualitative research and analysis.

Medical Data Data Mart — measures medical benefit payments in states and identifies specific procedure, drug, and provider cost drivers to guide legislative change.

A partner with unique regulatory expertise

Why choose workers' comp reporting from us? Because we know state reporting requirements inside and out. A third of the states using EDI reporting partner with us to collect insurer data on their behalf with wcCapture.

We'll help you:

Manage EDI data more proactively

Determine industry trends and make improvements

Ensure data accuracy and timely EDI reporting

Achieve actionable insights using advanced analytics
