

# ALIR State Requirements

## Did you know...

**Thirty-six** states have automobile liability insurance reporting (ALIR) requirements, and **three** states have legislation pending approval. Verisk CV-ALIR® helps you meet state requirements.

### Requirements

- |                           |  |
|---------------------------|--|
| Online verification (OLV) | No legislation   |
| Book of business          | CV-ALIR requirements coming soon — pending legislation |
| Transactional             | Commercial optional                                    |
| Pending implementation    | Errors reported by paper only                          |

**Online verification (OLV):** Coverage is verified in real time. The state sends an inquiry to the insured and expects a "confirmed" or "not confirmed" response within seconds.

**Book of business:** The state verifies coverage using an internal database and requests that a file of all in-force vehicles be sent at specified times to maintain the database.

**Transactional:** The state verifies coverage using an internal database. The state requests that policy changes (such as VIN add, VIN delete, new policy, cancellation) be sent at specified times to maintain the database.
