Scope 3 (MT CO ₂ e)	8,152.2	8,152.2	9,775.6	9,775.6	9,998.4	9,998.4	1,927.6	1,929.3	688.2	693.4
Scope 1,2,3 Total (MT CO ₂ e)	24,536.1	14,187.8	29,561.0	17,037.7	30,368.7	18,858.2	14,074.3	4,968.3	11,511.7	3,998.7
Carbon Offsets Available	n/a	26,292	n/a	21,499	n/a	39,461	n/a	38,102	n/a	33,133
Carbon Offsets Retired	n/a	(14,188)	n/a	(17,038)	n/a	(18,859)	n/a	(4,969)	n/a	(3,999)
Emissions Total	24,536.1	0	29,561.0	0	30,368.7	0	14,074.3	0	11,511.7	0

1. [See the external assurance report](#) prepared by an independent third party.
2. According to CDP Technical Note: Accounting of Scope 2 emissions, the location-based method quantifies “Scope 2 greenhouse gas (GHG) emissions based on average energy generation emission factors for defined locations, including local, subnational, or national boundaries.” The market-based method quantifies “Scope 2 GHG emissions based on GHG emissions emitted by the generators from which the reporter contractually purchases electricity bundled with instruments, or unbundled instruments on their own.”

Notes:

The organizational boundary for each year covers 100 percent of the units then conducting business within the Verisk family of companies. Divestitures and acquisitions were addressed as follows:

- The 2017 emissions of seven companies acquired by Verisk were added for the months indicated: Healix (March - December), Fintellix (April - December), MAKE (June - December), Geomni (July - December), G2 Web Services (September - December), LCI (September - December), and Rebmark (December).
- The 2018 emissions of five companies acquired by Verisk were added for the months indicated: Service Software (January - December), PowerAdvocate (January - December), Marketview (February - December), Business Insight (March - December), and Validus-IVC (July - December).
- The 2019 emissions of four companies acquired by Verisk were added for the months indicated: Keystone Aerial Surveys (August - December), Property Pres Wizard (September - December), Build Fax (November - December), and Genscape (December). Emissions for Verisk Retail are reported only through the month of its divestment.
- The 2020 emissions of one company acquired by Verisk were added for the months indicated: Franco Signor (October - December). The 2020 emissions of two divestments are not included: the aerial imagery sourcing group formerly associated with Geomni, and the compliance background screening business known as Intellicorp.
- The 2021 emissions of five companies acquired by Verisk were added for the months indicated: Jornaya (January - December), Whitespace (April - December), Roskill (July - December), Ignite (September - December), and Data Driven Safety (December). Includes emissions from Verisk 3E and Verisk Financial, which have since been divested.

Verisk’s reported total energy consumption for 2021 was 38,038.45 MWh. The total included non-renewable energy consumption of 13,260.11 MWh and renewable energy consumption of 24,778.34 MWh. The corresponding totals for 2020 and 2019 were 39,920.92/11,706.97/28,213.95 MWh and 71,390.89/36,350.4/35,040.49 MWh, respectively.

Scope 3 reporting is optional. Verisk’s annual Scope 3 inventory totals represent emissions from business air travel and downstream leases. The percentage attributable to business air travel is 99.7% (2017), 100% (2018 and 2019), 98.6% (2020), and 94.2% (2021).

Totals are rounded. To find our emissions for 2015 and 2016, please see Verisk’s 2016 and 2017 Corporate Social Responsibility Reports, respectively.
