Scope 3 (MT CO ₂ e)	8,152.2	8,152.2	9,775.6	9,775.6	9,998.4	9,998.4	1,927.6	1,929.3	688.2	693.4
Scope 1,2,3 Total (MT CO ₂ e)	24,536.1	14,187.8	29,561.0	17,037.7	30,368.7	18,858.2	14,074.3	4,968.3	11,511.7	3,998.7
Carbon Offsets Available	n/a	26,292	n/a	21,499	n/a	39,461	n/a	38,102	n/a	33,133
Carbon Offsets Retired	n/a	(14,188)	n/a	(17,038)	n/a	(18,859)	n/a	(4,969)	n/a	(3,999)
Emissions Total	24,536.1	0	29,561.0	0	30,368.7	0	14,074.3	0	11,511.7	0

1. [See the external assurance report](#) prepared by an independent third party.
2. According to CDP Technical Note: Accounting of Scope 2 emissions, the location-based method quantifies “Scope 2 greenhouse gas (GHG) emissions based on average energy generation emission factors for defined locations, including local, subnational, or national boundaries.” The market-based method quantifies “Scope 2 GHG emissions based on GHG emissions emitted by the generators from which the reporter contractually purchases electricity bundled with instruments, or unbundled instruments on their own.”

Notes:

The organizational boundary for each year covers 100 percent of the units then conducting business within the Verisk family of companies. Divestitures and acquisitions were addressed as follows:

- The 2017 emissions of seven companies acquired by Verisk were added for the months indicated: Healix (March - December), Fintellix (April - December), MAKE (June - December), Geomni (July - December), G2 Web Services (September - December), LCI (September - December), and Rebmark (December).
- The 2018 emissions of five companies acquired by Verisk were added for the months indicated: Service Software (January - December), PowerAdvocate (January - December), Marketview (February - December), Business Insight (March - December), and Validus-IVC (July - December).
- The 2019 emissions of four companies acquired by Verisk were added for the months indicated: Keystone Aerial Surveys (August - December), Property Pres Wizard (September - December), Build Fax (November - December), and Genscape (December). Emissions for Verisk Retail are reported only through the month of its divestment.
- The 2020 emissions of one company acquired by Verisk were added for the months indicated: Franco Signor (October - December). The 2020 emissions of two divestments are not included: the aerial imagery sourcing group formerly associated with Geomni, and the compliance background screening business known as Intellicorp.
- The 2021 emissions of five companies acquired by Verisk were added for the months indicated: Jornaya (January - December), Whitespace (April - December), Roskill (July - December), Ignite (September - December), and Data Driven Safety (December). Includes emissions from Verisk 3E and Verisk Financial, which have since been divested.

Scope 3 reporting is optional. Verisk’s annual Scope 3 inventory totals represent emissions from business air travel and downstream leases. The percentage attributable to business air travel is 99.7% (2017), 100% (2018 and 2019), 98.6% (2020), and 94.2% (2021).

Totals are rounded. To find our emissions for 2015 and 2016, please see Verisk’s 2016 and 2017 Corporate Social Responsibility Reports, respectively.
