# Verisk™

# Evaluate driver-related risk in real time

## Driver Risk Management for Employers

# Safeguard your business with continuous driver monitoring

A fleet manager's vigilance doesn't end after the driver is hired.

- Violations can happen any time, on or off the clock, and commercial driver's license (CDL) data may not account for violations occurring on personal time.
- Motor vehicle report (MVR) orders are only required once a year, but your timelines for exposure don't need to be that broad.

Driver risk management tools from Verisk can help you not only receive real-time updates on violations or incidents involving your drivers, but also aggregate that data into fleetwide insights.

# Proactively manage reviews and timelines with DriverAdvisor® Monitoring

DriverAdvisor® Monitoring alerts you to any new activity reported on monitored drivers' records and automatically orders the MVRs you need, helping reduce your risk period from 12 months to just one.
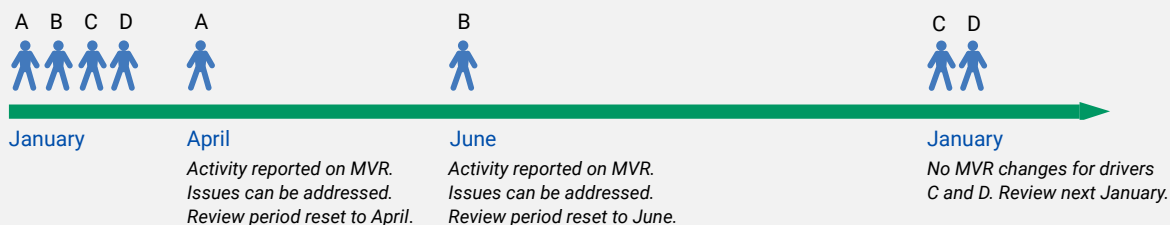

**Don't let unknown driving violations and changes in license status between review periods have detrimental effects on your business.**

With alerts from DriverAdvisor Monitoring, you learn of MVR changes more quickly, so you can take appropriate actions to reduce potential liability exposure before it causes real problems.

**Without DriverAdvisor Monitoring**

A  B  C  D

Activity Missed          Activity Missed

January        April              June                            January

*During annual review, employer discovers drivers A and B had activity on their MVRs in April and June but was unaware and could take no action.*

**With DriverAdvisor Monitoring**

A  B  C  D        A                  B                          C  D

January        April              June                            January

*Activity reported on MVR. Issues can be addressed. Review period reset to April.*

*Activity reported on MVR. Issues can be addressed. Review period reset to June.*

*No MVR changes for drivers C and D. Review next January.*

# Track trends across your fleet from one dashboard

Our paperless DriverSafe® Plus tool analyzes MVR data in minutes—even for thousands of drivers—compiling a dashboard of critical MVR metrics across your accounts and locations.

Dynamic filtering options also help you to:

- Evaluate enterprise-wide driver performance
- Compare drivers by region or other key driver group attributes
- See detailed information on individual accounts or drivers
- Order one, dozens, or even hundreds of MVRs in seconds

DriverSafe Plus can also help you understand your changing risk profile with:

- Side-by-side comparisons of drivers' recent and previous MVRs, with changes highlighted
- Display of your company's custom violation scoring
- Monthly executive summary reports of your risk analysis data, archived automatically

## DriverSafe Plus Interactive Reporting

See at a glance the driver information you need, and drill down to the critical details for effective management of your fleet. Features include:

**DriverSafe score**

- Your fleet classified with your scored risk scale
- Drivers in each classification band
- Details on individual drivers
- Violation library on individual drivers

**License expiration**

- Drivers with expired licenses or number of days until expiration

**Driver's last MVR**

- During the past months or year — or never

**Medical certificate expiration**

- Number of days until expiration

**Driver monitoring**

- Drivers by state license status
- Active and suspended/revoked licenses

**License status**

- Active and suspended/revoked licenses

*Additional data, including license type, driver age, tenure, and body mass index (BMI) available

# Quick, efficient, adverse action notice compliance

Our compliance department has extensive experience guiding customers in the use of our services. We're ready to help as you learn about your compliance obligations under the Fair Credit Reporting Act (FCRA), the Driver Privacy Protection Act (DPPA), and other requirements regarding the use of consumer reports.

# Solutions for the employee life cycle

Our transportation employment screening services can help employers and fleet managers evaluate risk and manage their workforces efficiently and confidently from before drivers are hired and throughout their tenure. Additional reports to support your business include:

- Individual county criminal searches
- Statewide criminal reports
- Social security number (SSN) verification/trace reports
- Sex offender search
- Government sanctions reports
- Employment verification
- Department of transportation (DOT) employment verification
- Education verification
- Adverse action notices
- Medicare/Medicaid sanctions searches
