

# Make hiring decisions, faster

## Transportation Employment Screening

### Identify qualified drivers with speed, quality, and safety in mind

Today's tight labor market demands fast, accurate, and cost-effective screening to identify the best candidates. However, the average driverhire typically requires several reports from different sources—which can cost you valuable time in the hiring process.

Receiving this data in real-time as you're screening an applicant can help you centralize the essential documentation you need to move quickly and confidently.

### Driving the decisions that drive your business

Knowing the facts on applicants and employees alike can help promote safety and reduce risk. Verisk provides solutions for the entire employee life cycle. Look to us to help you:

- effectively manage driver-related risk across your entire fleet
- easily keep track of changes in your drivers' motor vehicle records as they happen
- maintain FCRA compliance by providing required
- notifications to applicants and employees regarding background check results

### Whether you're looking to hire a driver for over-the-road, "last mile," or other business functions we've got you covered.

Screening for safe, compliant driving history is essential for any position you're filling, and our driving-specific reports include:

- Motor Vehicle Reports (MVRs)
- Commercial Driver's License Information System (CDLIS Search)
- DOT compliance
- DOT verification
- Pre-Employment Screening Program from the Federal Motor Carrier Safety Administration

A hiring decision may require essential information beyond driving history. Additional reports and services include:

- Employment and education verification
- Criminal record searches
- SSN verification report
- Government and Medicare/Medicaid
- sanctions reports

**Avoid costly hiring mistakes by using criminal background information that's verified at the source and compliant with the Fair Credit Reporting Act.**

Get nationwide, county-level criminal record searches based on a person's address history and Social Security number and draws from the most current criminal history information available. The screening tool verifies the data directly at the source for more accurate results and fewer false positives. You'll get:

- Social Security verification
- County-level criminal record search
- Sex offender registries search
- Office of Foreign Assets Control (OFAC)
- Sanctions List search
- Multistate index of criminal and arrest records search
- Department of corrections records search
