Better align price to risk with one of the most robust VIN decoding solutions available to the industry.

Understanding vehicle risk is critical to improving segmentation, refining pricing, and enhancing profitability. Some vehicle identification number (VIN) solutions are limited to mass-manufactured passenger vehicles, but Verisk’s CL VIN Decode provides a more comprehensive option for commercial auto insurance books. Leverage 50+ detailed physical risk attributes to gain greater insight into the millions of specialized vehicles you may insure—helping better evaluate and rate each unique risk.

Gain a more holistic view of risk for:
- Trailer and truck-tractors
- Extra-heavy-duty to light vehicles
- Powersports and off-road motorcycles
- Low-volume, specialized manufacturers

Integrate vehicle insights and rating

CL VIN Decode identifies components of vehicle risk. When combined with the ISO Commercial Auto Class Plan, insurers can rate more accurately on granular factors, such as vehicle weight and class.
Leverage innovation to lift results

Amid a hard market, riskier driving behavior¹, and record social inflation costs², we can help you achieve profitable growth with deeper vehicle insights, improved risk segmentation, more accurate pricing, and significant competitive advantages.

CL VIN Decode enables you to:

• Help ensure accuracy, timeliness, and consistency with solid data standards
• Access dozens of vehicle risk attributes via API, flat file, or bulk reporting
• Decode manufacturers with low production and highly specialized vehicles
• Keep up to date with continuous industry and product research, identifying new vehicles, types, and features as they enter the market
• Harness unique analytics as vehicle data and technologies evolve

Vehicle risk solutions and more...

CL VIN Decode adds to the 80+ vehicle risk attributes now available through Verisk’s Commercial Auto Suite, as well as solutions for driver risk, mileage radius, auto firmographics, coverage, advisory loss costs, and more.

3. AM Best Aggregates and Averages, 2011-2021
4. Federal Motor Carrier Safety Administration, 2021 Pocket Guide to Large Truck and Bus Statistics, January 7, 2022; the rate of fatal crashes involving large trucks per million vehicle miles traveled has generally increased each year over the past decade of available data, 2010-2018
