Get your territories right— down to the address level

Managing territories can be a resource drain

Assigning the right territories to your policies using internal resources can be costly and time-consuming. But getting the job done quickly and efficiently is vital to correctly calculating premiums.

Verisk brings decades of experience working with territory definitions, allowing insurers to focus on their business needs—whether it's accelerating workflows or improving the customer experience.

Gain accuracy from a wealth of data

Territory Services provide codes for addresses spanning the entire United States. The service incorporates extensive postal and street databases and powerful Geographic Information Systems (GIS) technology, delivering high-quality data that can help you assign the correct territory code, every time.

Territory Services help assign the right territories to your policies quickly and efficiently.

Verisk

Easily master standard and custom territories

Territory Services streamline the assignment of the correct territories across your book of business. Information is available for:

- personal auto rating territories
- commercial auto rating territories
- personal property rating territories
- commercial property statistical reporting territories
- Group II zones
- businessowners rating territories
- commercial earthquake rating territories
- commercial general liability rating territories
- California Department of Insurance earthquake zones
- Citizens Property rating territories (Florida only)

The service is available for all 50 states and the District of Columbia. Codes are also available for independent-bureau and state-promulgated territories, as well as unique risks that are hard to pin down.

Custom data files are also available for insurers' own unique rating territories.

Flexible delivery methods

Delivery methods are available to adapt to your business operations, systems environment, and requirements, integrating the information into your rating, policywriting, or consumer quoting system.

Access Territory Service:

- online through your browser or by connecting to Verisk using a web service API
- as a batch delivery
- through Verisk platforms: LOCATION® and ProMetrix®
