

One size fits you.

Integrating the LightSpeed Small Commercial API

Insurers know they need data and analytics to grow their business. But integrating new data sources and technology partners can require significant IT resources and time.

One API, lots of data

With just a business name and address, LightSpeed Small Commercial serves up critical underwriting intelligence on nearly every small business in the country. It's backed by a robust, flexible architecture that leverages the power of microservices to deliver near-instantaneous insights when insurers need them. Through a single RESTful API, you gain access to a vast trove of validated, proprietary data and underwriting analytics for prefill and accelerated underwriting, including:

Technology is the priority

54%

of insurance CIOs reported spending more money on analytics technology¹

76%

of agents said they would send more business to carriers if those carriers improved their technology²

But only if it checks the right boxes³

1. Cost to implement
2. Time to implement
3. Execution risk
4. A project's contribution to strategic goals

With LightSpeed® Small Commercial, consider them checked.

Hundreds of installations, one theme

With a deep understanding of insurance technology and over 50 years of experience managing large insurance datasets, Verisk is uniquely positioned to help ensure a smooth integration and continued, responsive support. After hundreds of successful implementations across numerous IT architectures, we know that no two insurers' tech stacks and infrastructure are alike. Every business has unique needs and requirements. We're here to make it easy.

What's your model?

- Distributed/on-premises
- Cloud-based

What's your need?

- Straightforward documentation that's easy to digest
- Help integrating software into infrastructure
- Insights into industry best practices
- A single point of contact through the life of the relationship
- All of the above!

**Ready to invest in powerful underwriting analytics?
This is the IT support you deserve.**
