

Verisk Inventory of Greenhouse Gas Emissions¹

2015–2018

	2015 Location- based	2016 Location- based	2017 Location- based	2017 Market- based	2018 Location- based ²	2018 Market- based ²
Revenue (\$ millions)	1,760.7	1,995.2	2,145.2	2,145.2	2,395.1	2,395.1
Employee Full-Time Equivalent	5,670.2	5,998.4	6,661.8	6,661.8	7,652.5	7,652.5
Scope 1 (MT CO _{2e})	3,800.1	3,471.1	4,607.9	4,607.9	6,830.8	6,830.8
Scope 2 (MT CO _{2e})	12,496.1	12,086.6	11,776.0	1,427.7	12,954.6	431.3
Scope 3 (MT CO _{2e})	7,735.6	8,093.8	8,152.2	8,152.2	9,775.6	9,775.6
Scope 1, 2, 3 Total (MT CO _{2e})	24,031.8	23,651.5	24,536.1	14,187.8	29,561.0	17,037.7
Carbon Offsets Available	N/A	N/A	N/A	26,292	N/A	21,499.0
Carbon Offsets Retired	N/A	N/A	N/A	(14,188)	N/A	(17,038.0)
Emissions Total	24,031.8	23,651.5	24,536.1	0	29,561.0	0

2019 (update to chart in progress)
2018

2. According to CDP Technical Note: Accounting of Scope 2 emissions, the location-based method quantifies “Scope 2 greenhouse gas (GHG) emissions based on average energy generation emission factors for defined locations, including local, subnational, or national boundaries.” The market-based method quantifies “Scope 2 GHG emissions based on GHG emissions emitted by the generators from which the reporter contractually purchases electricity bundled with instruments, or unbundled instruments on their own.”

Notes:

Organizational boundary covers 100 percent of the units conducting business within the Verisk family of companies for the years ending December 31, 2015, 2016, 2017, and 2018.

- The 2015 and 2016 emissions of Verisk Health, divested by Verisk during 2016, aren’t included in the inventory. The emissions of two companies acquired by Verisk during November 2015—Infield and PCI—were added to the inventory for the months of November and December 2015.
- The 2016 emissions of five companies acquired by Verisk during 2016 have been added to the inventory for the months indicated: Analyze Re (November and December 2016), GeoInformation Group (December 2016), Greentech Media (August through December 2016), MarketStance (December 2016), and Risk Intelligence—Ireland (May through December 2016).
- The 2017 emissions of seven companies acquired by Verisk during 2017 have been added for the months indicated: Healix (March through December 2017), Fintellix (April through December 2017), MAKE (June through December 2017), Geomni (July through December 2017), G2 Web Services (September through December 2017), LCI (September through December 2017), and Rebmark (December 2017).
- The 2018 emissions of five companies acquired by Verisk have been added for the months indicated: Service Software (January through December), PowerAdvocate (January through December), Marketview (February through December), Business Insight (March through December), and Validus-IVC (July through December).

In conjunction with the 2016 inventory, reported 2015 emissions for business air travel were restated, reflecting a change in calculation methodology necessary to allow an appropriate comparison between both years.

Scope 3 reporting is optional. Verisk’s annual Scope 3 inventory totals represent emissions from business air travel and downstream leases. The percentage attributable to business air travel is 96.9 percent (2015), 99.3 percent (2016), 99.7 percent (2017), and 100 percent (2018).

Totals are rounded.
